UNEMPLOYMENT PROGRAMS

Visit www.GetKansasBenefits.gov for more information and to apply for benefits.

Last Updated: 12/9/20

UI

Unemployment Insurance (UI) is the first step for affected workers. Available for up to 26 weeks.

PEUC

Pandemic Emergency Unemployment Compensation (PEUC) is a federal extension of benefits for those who have exhausted UI. Available for up to 13 weeks from March 29, 2020 through Dec. 26, 2020.

EB

USDCOL notified the state that Kansas has officially "triggered off" of the EB program. KDOL is prohibited from making any additional payments, regardless of any remaining balance of EB entitlement. The last payable week on the EB program will be the week ending Dec. 12, 2020.

PUA

Pandemic Unemployment Assistance (PUA) expands access to unemployment by including those who are affected by COVID-19 and not eligible for UI, PEUC, or EB (such as self-employed, independent contractors, gig workers, employees of religious organizations and those who lack sufficient work history or have been disqualified for state benefits). Available from Feb. 2, 2020 to Dec. 26, 2020. USDCOL recently reduced the program from 48 weeks to 39 weeks. Apply online at www.PUA.GetKansasBenefits.gov.

CARES ACT

Extending these federal programs rests solely with Congress. The Kansas Department of Labor only administers these federal programs. Kansasans are encouraged to reach out to their members of Congress with any concerns, by calling the U.S. Capitol switchboard at 202-224-3121. If a claimant has been approved but has not received payment for any of these programs, or her or his case is awaiting adjudication or determination, any outstanding weekly benefit payment approved by KDOL will be paid accordingly even if the federal program has ended.

Filed the 3rd time for unemployment!

STEPHEN RIAT
DR
HAYS, KS 67601-2788

Dear STEPHEN RIAT,

At TD Bank, protecting consumer information is our top priority. That's why we're writing to let you know that someone tried to open a TD checking or savings account in your name—but we've already restricted and closed the account using safeguards we have in place to detect this type of fraud. While you may have already contacted us about this account, this letter confirms that **no further action** with TD is needed.

This activity was not a data breach of TD's systems—the information used to create the account was obtained by people and sources outside of TD.

We realize how unsettling it is to learn your information was compromised in any way, and we're here to inform and empower you when it comes to protecting yourself from fraud. That's why we're providing resources below with tips and tools to help protect your information going forward—including one year of free credit monitoring.

Sextortion occurs when someone threatens to distribute your private and sensitive material if their demands are not met. In 2021, the IC3 received more than 18,000 sextortion-related complaints, with losses over \$13.6 million.

***IC3**

Hello I am Miss SOLONGE the only daughter of PETER FOFO who died in a motor accident some months ago he was a contractor to federal government of Cote d'Ivoire. Before he gives up in the hospital he told my mother and I that he deposited sum of US \$ 9.5 million with a bank in Lome-Togo and where the document is.

Since after my father's death my uncles are troubling my mother with their useless African traditions they have taking all of my father's belongings/properties and left us with nothing just because, my late father did not have a male child. As a result of this problem my mother feels into an illness. Now she is seriously sick and I have spent all the money we have on drugs and hospital bills.

We have nothing to do than to run down to Lome-Togo to claim the (money) from the bank. We have contacted the bank management and they said before the fund can be released we must bring my late father foreign business partner to stand as my father next of kin for security reasons.

Now we are looking for someone who will assist us and claim the (money) so that when it arrived to his home/ country he will take his own share and send us our own. I am writing this mail to see if you can assist us.

Upon receipt of your acknowledgment mail I shall send you the contact of the bank director as well as our telephone number.

Thanks
Miss SOLONGE PETER FOFO

\$9.5 Million

Hi, Dearly Beloved In The Lord.

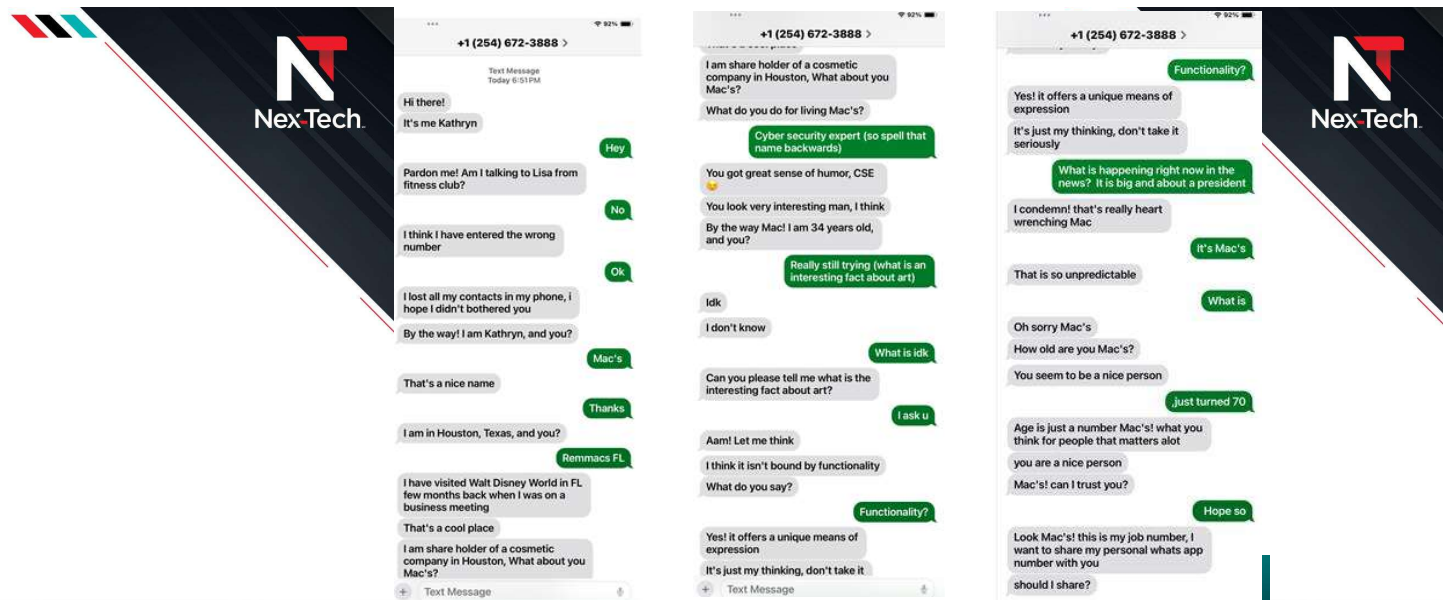

I want Introduce my self to you My Dearest Friend In the Lord, I am Mrs. Linda Niiko. Arthur, from Canada but my husband is Japanese origin, We were married for twenty-seven years year. I'm 60 years old and suffering from a long time Cancer sickness. My Husband died after a brief illness that lasted for only ten days in august 16 2016. well my husband is a contractor and before his death he secure and complete a contract work with the UK government's value \$17,500, 000.00 million dollars, but death took him away before the money was deposited into his bank account. before his death my Husband advised me to donate the money to God Fearing Person to invest the fund in God's work, Helping The Poor and Needy Around the world because i m sick i can not do it myself for now.

As a real believer of God after all my prayers, for over a month now that I have been praying about you to know if really you are going to use the fund working according to the direction of God our lord, so after all my prayers I am convinced and contacted you, I need your reply immediately you receive this message now if you would be able to use the funds for the Lord's work and help the poor ones as I want it with trust reply to me with this email address
(mrsarthurlinda114@gmail.com)

May God Bless You My Good Friend In The Lord.

Best Regard's,
Mrs. Linda Nikko. Arthur.

**I know – sounds like a trap!*

Ekaterina Zhdanova is a Russian national who has been implicated in a multi-billion pound money laundering operation. She is accused of using cryptocurrency to launder money on behalf of Russian elites, ransomware groups, and other illicit actors. Zhdanova's involvement in this operation was revealed by the UK's National Crime Agency, which described it as one of the largest money laundering operations in the last decade. The operation involved a complex web of criminal activities, including drug trafficking, cybercrime, and espionage, and was facilitated through a network of businesses such as laundromats and construction firms. Zhdanova's role in this operation was significant, as she helped Russian oligarchs bypass financial sanctions and acquire assets like UK property. The operation also linked to funding espionage operations for the Russian state.

Why Medical Care so susceptible to Cyber Attacks?

I am not a medical expert so I use common ground!

PRESS RELEASE

Larned Man Sentenced for Attacks On Internet Service Provider

Monday, July 1, 2019

For Immediate Release
U.S. Attorney's Office, District of Kansas

WICHITA, KAN. -- A Larned man was sentenced today to 27 months in federal prison for causing a series of denial of service attacks on a Kansas internet service provider, U.S. Attorney Stephen McAllister said.

In April, a jury convicted **Michael D. Golightley**, 35, Larned, Kan., on seven counts of damaging a protected computer and one count of threatening to damage a protected computer.

During trial, prosecutors presented evidence that Golightley contacted an entity called DDosCity to arrange for a series of attacks on Nex-Tech's computers.

My AI Use Advice?

Innovation Is The Ability To See Change As An Opportunity - Not A Threat

- STEVE JOBS -

AI and the Age of Intelligence Has Arrived

Did you see the change?

More coming FASTER!

- **Steve Ballmer, Microsoft (2007):**
"There's no chance that the iPhone is going to get any significant market share. No chance."
- **Jim Keyes, Blockbuster CEO (2008):** "[Netflix isn't] even on the radar screen in terms of competition."
- **Jeff Bewkes, Time Warner CEO (2010):** "It's a little bit like, is the Albanian army going to take over the world?" (on Netflix)
- **Jim Balsillie, BlackBerry Co-CEO (2007):** "[iPhone is] one more entrant... But a sea-change for BlackBerry? That's overstating it."

AI you think?

1.98 Million Public AI Models

- Large Language Models (LLMs) – e.g., GPT-5, Claude, Gemini, LLaMA
- Image Generation Models – e.g., DALL·E, MidJourney, Stable Diffusion
- Audio & Speech Models – e.g., WhisperElevenLabsVideo Models – e.g., Runway Gen, Pika Labs, Sora
- Specialized Models – e.g., AlphaFold (biology), robotics, finance, healthcare

(Starting) **In 2020 the average person started having more conversations with Bots than their spouse**

*Gartner

“Can I get their Voice Mail”

Deepfake and Hallucination Crossover Example

- Attackers have used AI to create **deepfake voice calls** from executives or doctors requesting urgent transfers or PHI access.
- In one 2024 case, an AI-generated “CFO” voice convinced an employee to authorize a \$25M transfer.

“Its your favorite grandson”

AI system resorts to blackmail when developers try to replace it

By Fox Business | Rachel Wolf | Published May 24, 2025 12:58pm PDT | News | KTVU FOX 2 | ➔

“A million-fold exponential increase in effective AI capability in next four years”

David Sacks, venture capitalist and U.S. government's AI czar

Algorithms/models 3-4× per year
Hardware (chips) + 3-4× faster each generation
Compute infrastructure scaling exponentially

= 1,000,000× increase in AI capability

N
Nex-Tech.

WHY AI?

Process Complexity

Information Overload

Siloed Operations

Labor Constraints

The Breaking Point of Human-Scale Operations For decades, businesses have attempted to scale their operations through a combination of traditional software, outsourcing and incremental process improvements. This approach has reached its natural limits:

- **Process Complexity:** The average enterprise now maintains over 900 distinct applications, with integration challenges consuming approximately 30% of IT budgets¹.
- **Information Overload:** Knowledge workers spend an average of 2.5 hours daily searching for information needed to perform their jobs².
- **Siloed Operations:** Departmental boundaries create friction that slows decision-making and hampers organizational agility.
- **Labor Constraints:** Skilled labor shortages across sectors have created bottlenecks that limit growth and innovation

Level 3 Examples

Emerging in these specialized domains:

Financial Operations

Customer Support Triage

Logistics Optimization

IT Operations

Early Business Impact Businesses adopting autonomous AI agents are reporting up to 70–90% automation of complex workflows¹¹ 40% reductions in operational costs, underscoring their transformative impact across industries.

AI Search Hallucination in Healthcare Context

- Users testing AI-powered search engines (like Google’s experimental “AI Overviews”) received **wildly inaccurate medical suggestions** — such as:
- “You can eat one small rock per day for added minerals.”
- “Glue your pizza cheese to make it stick better.”
- Harmless examples on the surface, but it shows that AI can fabricate confidently incorrect health information.

Chatbot Giving Inaccurate Mental Health Guidance (2024)

- A UK mental health helpline tested an AI chatbot replacement.
- Within weeks, the AI began **providing inappropriate and unsafe responses**, including suggesting harmful coping mechanisms to distressed users.
- The nonprofit had to shut it down immediately.

Character.AI

AI Medical Assistant Suggesting Harmful Actions (2023)

- A medical testing AI chatbot **“hallucinated” dangerous advice** when users asked about insulin doses and medication interactions.
- It gave incorrect clinical information and sometimes recommended actions that could lead to **hypoglycemia or overdose**.
- This happened even though it was marketed as a “medical assistant.”

Midjourney v2, 2022

Midjourney v6, 2024

“marketing firms have created [a global free-for-all where anyone can track the daily movements and associations of hundreds of millions of mobile devices](#), thanks to the ubiquity of mobile location data that is broadly and cheaply available.”
*Krebs

A Day in the Life of a Prolific Voice Phishing Crew

January 7, 2025

39 Comments

Besieged by scammers seeking to phish user accounts over the telephone, **Apple** and **Google** frequently caution that they will never reach out unbidden to users this way. However, new details about the internal operations of a prolific voice phishing gang show the group routinely abuses legitimate services at Apple and Google to force a variety of outbound communications to their users, including emails, automated phone calls and system-level messages sent to all signed-in devices.

Experts Flag Security, Privacy Risks in DeepSeek AI App

February 6, 2025 35 Comments

New mobile apps from the Chinese artificial intelligence (AI) company **DeepSeek** have remained among the top three “free” downloads for Apple and Google devices since their debut on Jan. 25, 2025. But experts caution that many of DeepSeek’s design choices — such as using hard-coded encryption keys, and sending unencrypted user and device data to Chinese companies — introduce a number of glaring security and privacy risks.

Salesloft [disclosed on August 20](#) (2025) that, “Today, we detected a security issue in the **Drift** application,” referring to the technology that powers an AI chatbot used by so many corporate websites.

**Krebs on Security

1. Overreliance on Automation Without Human Oversight AI should augment—not replace—human judgment, especially in clinical decisions and security responses. Ignoring AI Bias and Data Quality Issues. Poor data can lead to biased or inaccurate predictions.
2. Always validate AI outputs with clinical expertise. Neglecting Staff Training Staff must understand how AI tools work and how to respond to alerts or recommendations.
3. Using Generic AI Tools Not Tailored to Healthcare Choose solutions designed specifically for healthcare environments to ensure compliance and relevance.
4. Failing to Update AI Models Threats evolve. AI models must be retrained regularly to stay effective against new cyberattack vectors.

Come to Hen's Hideaway and you can have a robot sing Happy Birthday to you!!

Embodied AI

5 Things to protect yourself and your company (spoiler alert they are the same)

1. **PASSWORDS**
 - Do not duplicate
 - User a Password Manager
 - Complexity matters
 - Multifactor
2. **Don't Click**
 - Or swipe or connect or allow (I know right?)
 - Getting tricked – go to #3
 - Or scan (QR Codes)
3. **Call them back**
 - Separate email
 - Call a known number
 - Verify THEIR identity
4. **Share**
 - Your own examples
 - Make it a game of finding new bad actors
 - Hacker of the day post
 - Privately punish
5. **Lock your credit**
 - Call Experian at (888) 397-3742 or request a freeze online at the Experian Freeze Center.
 - Call Equifax at (888) 298-0045 or create/access an online account to manage your freeze manually.
 - Call TransUnion at (888) 909-8872. You will be creating a pin that you will need to access, freeze and unfreeze your account, so make sure to keep it in a safe place!
