Video Highlights How Expanding KanCare Can Benefit Kansas

(Topeka, KS – Feb. 12, 2013) - Medicaid expansion in Kansas would build upon our newly reformed Medicaid program, KanCare, which focuses on primary care coordination, improving health outcomes, managing health care costs and instituting patient accountability. Not only would expansion help 122,000 Kansans who can’t afford coverage, millions of new dollars would be injected into the Kansas economy – dollars that would support jobs and create more business. The Kansas Hospital Association created a two-minute informative video highlighting how Medicaid expansion is good for Kansas.

The Kansas Hospital Association is a not-for-profit association of health care provider organizations and individuals that are committed to the health improvement of their communities. KHA membership includes 217 member facilities, of which 126 are full-service community hospitals. Founded in 1910, KHA maintains its vision of “an organization of hospitals working together to improve access, quality and the affordability of health care for all Kansans.”
