

# 340B PROGRAM - CRITICAL TO KANSANS

## Support SB 284 that will protect patients' access to care.

For more than three decades, the 340B Program has enabled safety net providers like hospitals to purchase medications at a discount so they can “stretch scarce federal resources as far as possible, reaching more eligible patients and providing more comprehensive services.” - [HRSA 340B Drug Pricing Program](#)  
Big PhRMA and Pharmacy Benefit Managers restrictions are undermining the 340B program and harming patients' access to care in Kansas.

### The 340B Program

benefits patients by providing access to affordable, life-saving medications and medically necessary services.

More than 90 hospitals in Kansas, mostly rural, participate in the 340B program and provide necessary medical services to their communities.

### Preserve and protect

the 340B program. This program is an essential part of the safety-net and has strong bipartisan support.

## THE 340B PROGRAM SUPPORTS HEALTHIER KANSANS.

Hospitals use the 340B Program to provide services that improve patient outcomes and community health.

Access to lifesaving prescription drugs from local pharmacies.

Access to cancer and other serious illness treatment close to home.

Access to maternal health services in rural areas.

Improved access to mental health services.

Better prescription adherence rates.

Earlier screening and detection of cancer.

The 340B Program is NOT taxpayer funded.

While drug companies continue to realize record profits, health care facilities are facing one of the hardest times in recent memory. Without the 340B Program, many Kansas hospitals would have to reduce or discontinue services offered in their communities.

**CALL TO ACTION:** Tell policymakers to support Senate Bill 284 and to preserve the 340B Program to protect patients' access to care.
