Provider Enrollment

DXC Healthcare Payer Platform (HPP)

Provider Enrollment Wizard

Kimberly Worsham, Business Analyst
Donna Atkinson, Business Consultant

New Enrollment? You have more options.

- **Reference Information**
- **CAQH Number**
- **MCO selection**
- **W-9 E-Signature**
- **Capacity Page**

Attachments

Attachment Requirements have changed. If a provider chooses to enroll with an MCO, be prepared to attach all documents required by the MCO selected.

The system triggers a set of business rules that requires certain attachments types be provided in order to complete the enrollment.

MCO Consent Form

The provider will need to consent to sharing their data with the selected MCO.

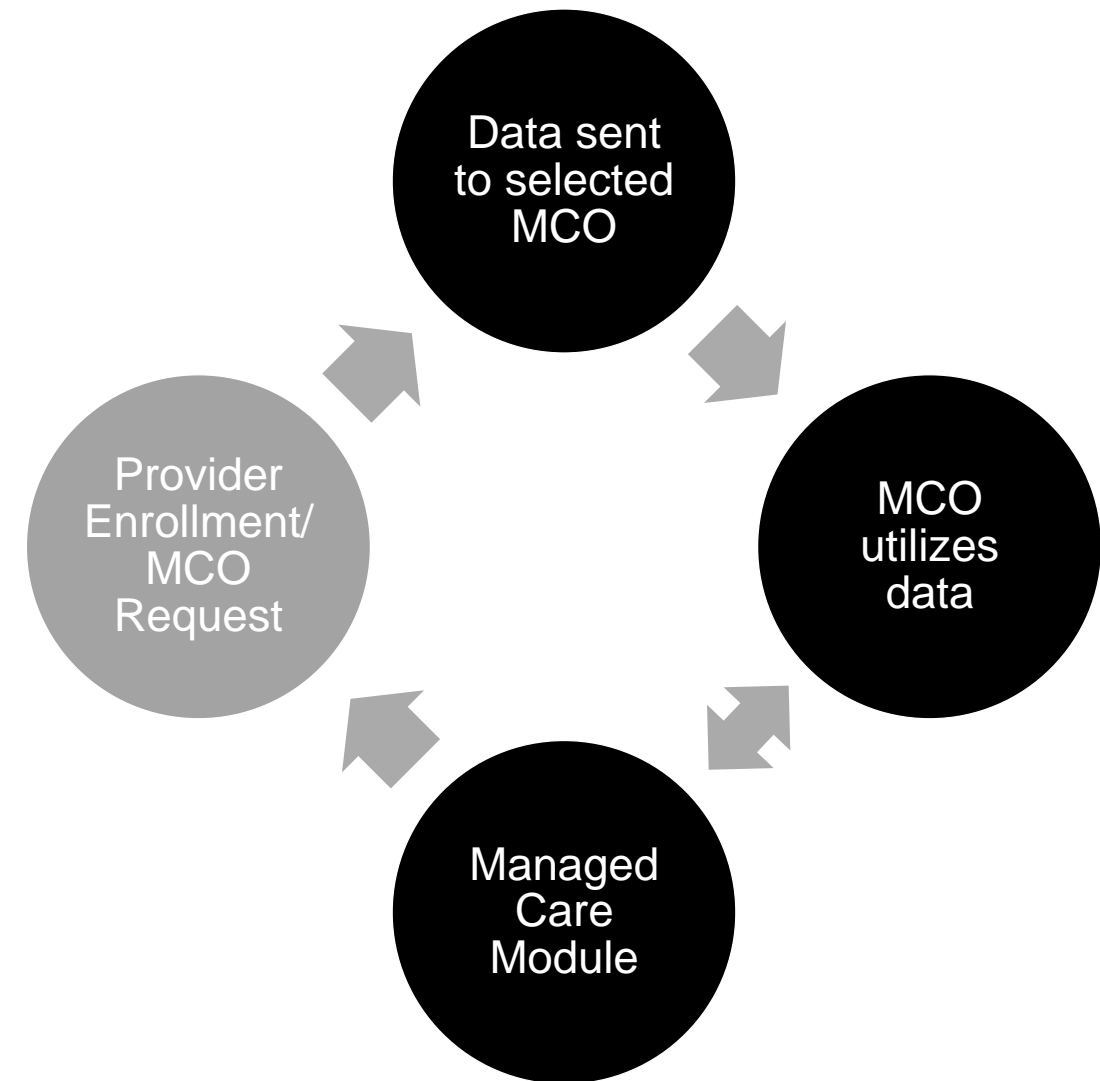

New process for MCO Request Form for adding another MCO

Existing providers can utilize the MCO Request Form via the Provider Enrollment Wizard.

Provider to Managed Care Organization Data Sharing

- Providers will continue to be screened by Kansas.
- However, now Provider data along with screening data will be forwarded to the Managed Care Organizations.
- MCOs may still ask for more information from the Provider.
- The Managed Care Organizations will communicate back to DXC decisions and/or changes in MCO contracts.

Let's Demonstrate

When is a new enrollment required?

- Adding a new provider type
- Adding a new service location
- Change in Tax ID

How are maintenance updates requested?

- Once an enrollment is complete, updates to the following attributes must begin with KMAP. All other updates may originate with either KMAP or an MCO.
 - NPI
 - Provider name
 - Provider types
 - Provider specialties
 - Taxonomy
 - Tax ID number
- Synchronization of the above data attributes between the plans and KMAP is critical to successful claims payment.
- Providers should use the data **exactly** as it appears on their current KMAP provider record when billing claims.

How are group associations maintained?

- For individuals practicing as a member of a group, only one application is required.
 - The group must enroll first supplying the KMAP ID of the group to all individual practitioners who intend to affiliate with their organization
 - Additional group affiliations for an individual within a group will be handled as maintenance requests through KMAP.
 - After supplying the KMAP ID of the group, KMAP will link the provider to the addition group that is being requested.
