Agenda

10:30 a.m. The Role of Data and Advanced Analytics in Transforming Healthcare *1.5 Hours of ACHE In-Person Credits Approved*

Routine doctor's visits are beginning to be replaced by regularly monitoring one's health status and remote consultations. The inpatient setting is being improved by more sophisticated quality metrics drawn from an ecosystem of interconnected digital health tools. The care patients receive can be decided in consultation with decision support software that is informed not only by expert judgments but also by algorithms that draw on information from patients around the world, some of whom will differ from the "typical" patient. However, recent developments in data analytics also suggest barriers to change that might be more substantial in the health care field than in other parts of the economy. Despite the immense promise of health analytics, the industry lags other major sectors in taking advantage of cutting-edge tools. Most health care organizations, for example, have yet to devise a clear approach for integrating data analytics into their regular operations. This program will focus on the role that data and advanced analytics play today and the potential role they will play in the future to impact operations, patient care, quality, safety, engagement & wellness, and healthcare costs. Attendees will learn the type of data and analytics that are in use today at health systems, lessons healthcare can learn from other industries, the challenges health systems face in integrating vast amounts of disparate data in real time and how to make the insights useful to the right people at the right time. The panel will also discuss how to optimize existing data and analytics initiatives at their organization.

Moderator: Ericka Beeler, Chief Executive Officer, Beeler Consulting

Panelist:

- Dan Friedman, Chief Executive Officer and Founder, Ethermed
- Joseph Tintera, Founder and Chief Executive Officer, CarePilot
- Jodi Fincher, Chief Executive Officer St. Joseph Medical Center

Noon Networking Lunch

1:00 p.m. AI Real World Applications: Success Stories in Rural and Urban Health Care *1.5 Hours of ACHE In-Person Credits Approved*

Ethical challenges arise in all aspects of healthcare and service, from the bedside to the boardroom. Hospital leaders and boards set the ethical compass of the organization by making decisions about priorities, policies, and resource allocation as they determine the best ways to meet the needs of their communities, while respecting their staff and the populations they serve. Understanding the expanding paradigm of planning, creating, and maintaining an ethical healthcare organization is crucial to help identify strategies for implementing ethics initiatives within your own organization. Healthcare leaders must "walk the talk" and demonstrate their commitment to ethics throughout their organization.

Moderator: Bobby Olm-Shipman, President and Chief Executive Officer, Saint Luke's South and East Regions

Panelists:

- Rachel Boyles, Chief Ancillary Officer, Golden Valley Memorial Healthcare
 - Timothy Alcorn, PhD, Managing Director, Medical Devices, Diagnostics and Health IT
Latham Biopharm Group
-

Agenda (cont.)

2:30 p.m. Break

2:45 p.m. AI Readiness: Innovation and Changing the Face of Healthcare Delivery
1.5 Hours of ACHE In-Person Credits Approved

Given the extensive changes in healthcare delivery and the technological landscape overall, there is a necessity to take stock of where the healthcare community stands on change and innovation, specifically regarding the use of technology. The demand for higher quality healthcare at a lower cost creates an imminent need for change and innovation in healthcare delivery. Healthcare has already seen innovations in the tools used to deliver care, including pharmacy products, medical devices, information technology, and biotechnology products. This innovation has changed and continues to change the way healthcare is delivered. This panel will discuss how health systems are using innovation in technology to improve the value of the healthcare they deliver. Examples may include using technology to improve connectivity, patient flow, provider efficiency, and/or quality measurement.

Moderator: Mary Martell, MBA, FACHE, President Strategy and Regional Development, Stormont Vail Health

Panelists:

- Michael Williams, Vice President and Chief Information Officer, LMH Health
- Fred Neis, MS, RN, FACHE, FAEN, Founder and Managing Partner, AdvisorRN

4:15 p.m. Networking Reception and Happy Hour

5:30 p.m. Adjourn

Attire

Business casual attire is suggested for this conference. Temperatures in meeting rooms are somewhat difficult to control; therefore, we recommend you dress in layers to allow for these variances.
